QUESTION OF WATER METERS

Interviews Based Upon Explanation of Water Supt. Smith.

OPINIONS PRO AND CON

Of the Members of Council in November, 1897, Mentioned as Voting for Filtration and Meters, Not One Members Having Voted for Latter—Statement of President Townsend, of Real Estate Exchange.

In yesterday's issue of one of the Norfolk papers was published a communication from Mr. H. L. Smith, superintendent of the water department, in which it was stated that the question of water meters was not a new one; that they were approved by a former Council and superintendent of the water department. This superintendent was Mr. James A. Riddle. A Virginian-Pilot reporter saw Mr. Riddle yesterday, and he confirmed the statement that he was in favor of meters, and recommended them in his report. He did not remember, however, whether or not Councils ever approved them. He hardly thought that the matter reached Councils.

Mr. Smith's communication stated that both filtration and meters were approved and so voted for November 30, 1897, the following members of the Council being present and voting aye upon the question: Common Council—Messrs. Allen, Cannon, Hugh C. Davis, L. W. Davis, East, Elliott (K. B.), Elliott (J. A.), Farant, Gwathmey, Taylor, Hanman, Kiernan, McFarland, McManus, Peelle, Ridgewell, Seneca, Yeatman and Winston. Select Council—Carroll, Baldwin, Briggs, Freeman (E. D.), Greenwood, Jacobs, R. Henry Jones, Walters and Williams.

A number of these Councilmen (all who could be reached) were interviewed by the Virginian-Pilot yesterday, and one of them only, Mr. Peelle, remembered voting on the proposition one way or the other.

Another said that although he favors meters, he thinks Mr. Smith's statement is partly misleading, in that meters were not approved by the Councils as he understood it. The following interviews speak for themselves:

MR. FRED GREENWOOD. "I don't remember the question of water meters ever having been before Councils before. I never voted for them, if I knew it, and I am against them. I remember that the question was discussed in the Council, but I do not remember it or having come up in an official way. I believe it would be had policy to put in meters, when we have plenty of water. Individually I would save money if we had meters, for I have a cistern of my own, but I am opposed to them."

MR. J. V. KIERNAN. "I would not venture to express an opinion of my own, as I haven't thought of the question sufficiently to do so. From what I have heard generally, to put in meters would be a bad thing to do. I never voted for meters in the former Councils."

LOST—SETTER DOG, 8 MONTHS old; color, dark red; rupture on stomach; white spots on breast. Reward if returned to 69 Cumberland street. nol-17

LOST—A THREE-LINK LEATHER Purse; 2 pockets; containing \$35.15—one twenty, one ten and one five dollar note and 15 cents in silver. Liberal reward if returned to 42 E. Main street. nol-31

BOARDERS. A FEW LADIES OR GENTLEMEN may obtain good board at reasonable rates by calling or addressing 193 Bute street. nol-31

BOARDERS—LARGE WELL VENTILATED rooms at the Old Dominion House, 70 Cumberland street. nol-1m

BOARDERS WANTED—BEST location in Norfolk; terms reasonable. Address "LOCALITY," this office. nol-31

mer Council that I know of. If the matter came up it was in connection with some other matter. I am certain I did not mean to endorse meters, as I haven't the knowledge on the subject to believe one way or the other yet."

MR. J. LEE SENECA. "I don't think the meter question has ever been before Council until now. At least I don't remember it coming before the last Council. As to whether or not I favor meters, it would probably be best for me to not give my opinion until the committee makes its report. We have no water famine now," he added significantly.

MR. G. TAYLOR GWATHMEY. "I think Mr. Smith's article in that one particular was misleading. I do not remember that the question of meters was ever voted on in that Council. However, I would have voted for them if I had thought the time ripe for their introduction. I favor a proper meter system."

MR. J. THOMAS PEELE. "I believe water meters are needed to stop the waste. Personally it makes but little difference to me what is done about the matter. I believe the people have a wrong idea of meters. It does not mean to restrict the use of water, but simply to make those who waste it pay for what they waste."

MR. W. M. HANNAN. "I couldn't say yet whether I am for or against meters. All I can say is, they would have to show me good reasons for voting for them. I don't remember it, if I ever voted on the question before. If the question ever came up I don't know it."

MR. W. L. WILLIAMS. "I don't think I have thought enough over the question to express an opinion on it. It is a matter that should have weighty consideration. It was never up in Councils when I was a member."

MR. FRANK JACOBS. "I remember voting for the \$250,000 appropriation, but if such a thing as endorsement of meters was embodied therein, I did not know it. I would have to see the resolution to believe that I voted for meters. I am against them at present, certainly."

MR. JAMES A. RIDGEWELL. "I never voted for meters and I never will."

OTHER COUNCILMEN. Messrs. W. B. Baldwin, R. Henry Jones and K. B. Elliott were also members of the Council when Mr. Smith includes in his list as having voted for meters. The Virginian-Pilot has previously published interviews with each of these gentlemen in opposition to meters.

Mr. K. B. Elliott, being ill at his home, was not interviewed. In June last, however, a reporter of this paper interviewed him at his peanut factory on the question of meters, and his interview was published with others. Among all those published there were none more pronounced in opposition to meters than Mr. Elliott's, as those who read it will remember. In fact it was so strong against meters that Superintendent Smith, of the water department, in discussing with the reporter the interviews published in this paper, directed his remarks against Mr. Elliott's arguments especially.

MR. THOMAS TOWNSEND, Editor Virginian-Pilot:

Dear Sir—In reply to your inquiry as to my views on the water or meter question, would say they are well expressed by Mr. R. Henry Jones in your issue of November 16th, although I think he omitted one very large item of expense connected with meter system, and that is the necessity of a change of closet. As we understand it it would be strictly necessary to change from the closet now in use in all of the tenement districts to the overhead closet system, and this would certainly entail on the owners of the property a much larger expense than Mr. Jones has stated. We all realize that the present pressure is not sufficient to give us a full supply of water, more especially on the second and third floors of our houses or public buildings. Does this arise from a lack of water? We are told not. The supply since the last purchase is more than ample; in fact, running to waste at the lakes, as I understand. The reason is this: We have one main from the pump house to the city and that not sufficiently large to supply the demand. In other words, it will not bear the pressure necessary to force the water to the upper stories. If the city has the necessary funds which to put in the meters, would it not be the part of wisdom to use those funds for another line of pipe; in other words, another main from the city to the pump house, that we might have the benefit of the waste going on at the lakes, instead of kicking at the so-called waste in the city. How are we now protected in the future? ONE MAIN ONLY. A large fire is likely to occur at any time in the future, as in the past. Pressure is called for and freely given. The one main gives way to the extra pressure, the supply is stopped and your firemen and costly engines are useless. The fire fund has its way. Water is God's free gift to mankind. Let us, then, not try to curtail the use of it, but try to bring it in more abundantly, and if the lakes now in use fail to give us a supply we need we will find plenty of other sources in due time. THOMAS TOWNSEND, President Real Estate and Stock Exchange.

A. & C. Canal Stockholders Meet. All of the old officers of the Albemarle and Chesapeake Canal Company were re-elected at a meeting held in this city yesterday. The following is a list of the officers:

Warren G. Elliott, president; Robert M. Cannon, vice-president and general manager; D. S. Burwell, secretary and treasurer.

The following were elected directors of the company: Robert M. Cannon, F. D. White, John Vermillion, R. St. P. Lowry, J. H. Chapman and W. Harris Day.

WATER BOARD MEETS

Newspaper Men Invited to Have An Explanation.

The Reason Why the Board Thought Contract With Norfolk Water Company Advantageous to the City—Mr. Pender's Explanation.

A special meeting of the Board of Water Commissioners was held yesterday at 12 o'clock, and the press was invited to be present. A special request was made that a representative of the Virginian-Pilot be there, as the Board wished to furnish this paper information in reference to the contract with the Norfolk County Water Company to furnish water for the City Park, which has received considerable attention in our columns.

There were present Messrs. McIntosh, and Osborne, of the Water Board; Mr. H. L. Smith, Superintendent of the Waterworks; Mr. J. T. Peelle, Registrar of the Department; City Attorney Taylor; Mr. H. V. Vall, of the Park Committee of the Councils; Mr. W. Pender, representing the Norfolk County Water Company, and Mr. R. E. Turner, Superintendent, Virginian-Pilot, and reporters of each paper.

The Board had taken exception to an article which appeared in the Virginian-Pilot's editorial columns, which after discussing the proposition to the contract with the Norfolk County Water Company to furnish the City Park with water, concluded as follows: "Surely there is something about the difficulties that the city has encountered, and which we have not yet been advised, and in the meantime an interested lot of citizens and taxpayers await the information."

Mr. McIntosh, explaining the object of the meeting in substance spoke, as follows:

"I have invited the newspaper men to learn if there were any information needed concerning the Water Department, and if so to give it to them. The newspapers have a right to comment on the acts of the Water Board, but they should not make statements which do people injustice." Mr. Turner refused to discuss the editorial in question, as he was not the editor of the Virginian-Pilot, but stated that the columns of his paper were always open for the discussion of all public questions, and that it would cheerfully print any information the Board desired to furnish the public on the subject.

The following statement was presented by Superintendent Smith as a reason why the Water Board thought the contract with the Norfolk County Water Company advantageous to the city. He stated that this opinion was concurred in by the Park Committee, the Finance Committee, the City Engineer and City Attorney:

PARK WATER PIPE LINE.	
Terminal railroad to Park gate, 4,357 feet 6-inch pipe, at 65c.....	2,832.05
Park Lines, 7,920 feet 4-inch pipe, at 45c.....	3,564.00
Six-inch line from city limits to railroad, 2,800 feet 6-inch pipe, at 50c.....	1,400.00
Valves, gates, &c.....	250.00
Total.....	\$3,046.05
Rate per cent.....	6
Interest on expenditure.....	402.30
To maintain line.....	25.00
Cost to pump 1,825,000 gallons, at \$25.....	45.62
Total.....	472.92

CONTRA.	
Contract with water Company, 1,825,000 gallons, at 15c.....	273.00
Saved to the city annually....	\$199.92

Five per cent upon \$3,999.40. In other words, considering the cost of running mains and the cost of delivering water by the city in such quantity, this being the only delivery made through this line, the cost to the city would be 25 1-3 cents per 1,000 gallons.

THE CONTRACT.

The contract with the Norfolk County Water Company was read by Mr. Pender as follows:

This agreement, made this day of November, in the year eighteen hundred and ninety-nine, between the Norfolk County Water Company, a corporation duly incorporated under the laws of the State of Virginia, with the principal office in the county of Norfolk, in the State of Virginia, party of the first part, and the city of Norfolk, in the State of Virginia, party of the second part.

Witnesseth:

First—That the Norfolk County Water Company covenants and agrees with the city of Norfolk to lay so much 4-inch water pipe, in the City Park, as may be designated by the Park Committee of the Councils, with so many hydrants and hose taps as may be so designated; such water pipe so laid to be of Ship's patent hydraulic pipe, of the same character as used by the Norfolk County Water Company in Virginia.

Second—That the city of Norfolk, in consideration of the fact that the Norfolk County Water Company has agreed to furnish so long as the city of Norfolk may desire through the said pipes a good and sufficient supply of potable water, at the rate of 15 cents per 1,000 gallons, measured through a water meter of standard make.

Third—That the Norfolk County Water Company further covenants and agrees with the city of Norfolk that they will sell at any time to the city of Norfolk, upon three months' written notice, all pipe so laid in the City Park at the rate of fifty (50) cents per foot; but if at the time of the purchase the said price of fifty cents shall appear to the city as being too high, then and in that event, the question of price shall be left to a board of arbitration; the city to appoint one member of said board, the Norfolk County Water Company to appoint one member of said board and the two members thus appointed to appoint the third member, and in case of their failure to agree on a third, such third arbitrator shall be appointed by the Judge of the Circuit Court of Norfolk city; the said board to fix the price that the city shall pay for the said pipe, not exceeding \$0.50 per foot.

Fourth—In case of the failure of the Norfolk County Water Company to furnish potable water as provided in this contract, then the said company shall remove the said pipes at its own expense within a reasonable time, in case the city does not desire to purchase the pipes on the terms stated herein.

Fifth—In laying or removing the pipes as set out in this contract the Norfolk County Water Company shall put the ground in the same condition as previously, and satisfactory to the keeper of the City Park.

Sixth—The city of Norfolk covenants and agrees to pay to the Norfolk County Water Company, so long as it may use said water quarterly, the first day of April, first day of July, first day of October, and the first day of January each year, at the rate of fifteen cents per one thousand gallons for water used as shown by the meter, the city of Norfolk having power to discontinue the use of said water at any time on giving three months' notice to said water company on the terms of purchase of said pipes as herein set forth.

Seventh—The City of Norfolk further covenants and agrees that whenever it discontinues the purchasing of water under this contract, then, and in that event, it will pay to the Norfolk County Water Company fifty cents (50c.) per foot for all pipe laid in the park, or so much as may be awarded as the value thereof by the arbitration board as named in paragraph "Third" of this agreement.

MR. PENDER'S STATEMENT.

The following letter was handed the Virginian-Pilot by Mr. Pender in connection with the contract discussion:

Norfolk, Va., Nov. 16. Virginian-Pilot, City:

As your paper has given considerable prominence to the contract between the city and the Norfolk County Water Company in the matter of furnishing water to the City Park, will you do me the kindness to publish this letter together with the contract, copy of which is attached. I feel confident that an examination by you and the public, it will be seen that the contract is as liberal and in every way protecting the city as it is possible for a contract to be.

It provides: First, that the water be sold through a meter of standard make and not requiring the consumption of any number of gallons.

Second, That the city can discontinue the use of water by giving three months' notice.

Third, That upon three months' notice the city can purchase the pipe at a price to be determined by a board of arbitration, not to exceed 50c. per foot. The city of Norfolk to appoint one member of said board, the Norfolk County Water Company to appoint one member, and the Judge of the Circuit Court of the City of Norfolk to appoint the third member.

It will be seen therefore that the city is not called upon to enter into a contract for any given time, or for the consumption of a single gallon of water. I understand that a member of the Finance Committee in the Common Council stated that the contract was such a good one for the city that he wanted the water company to be required to give bond to insure the city the performance on the part of the water company.

While it is true that I am the only stockholder or officer of said company residing in the city of Norfolk or the State of Virginia, I cannot conceive what possible difference this would make so long as the company pays its bills or carries out its contract.

The Norfolk County Water Company has its main now laid in front of the City Park, and the supply of water to the park would entail very little extra expense to my company, while the city of Norfolk in order to supply the park would have to run a main a considerable distance for this purpose alone. This was the only reason why I was in a position to offer a contract to the city which would cost them less money than the city could possibly do the same work for.

I never had any idea or thought of purchasing the city water works, and, as a matter of fact, it would require a legislative enactment to enable the city to sell.

Very truly,

W. D. PENDER,

Attorney Norfolk County Water Co.

HEAVY POULTRY RECEIPTS.

NORFOLK'S POULTRY PACKING HOUSES DOING A GOOD BUSINESS ALREADY.

The new poultry packing house has started off most successfully and with great promise for the future. Several car loads of Southwest Virginia fowls have been received and the force of employees is kept busy killing, dressing and packing them for the demands of the trade.

Among the fowls are a number of fine turkeys, ordered for the Thanksgiving Day demand. These turkeys average higher than any lot of turkeys ever received before on this market. Some of them weigh from twenty to twenty-five pounds.

The apparatus installed for use in dressing the fowls, such as steam baths, works perfectly. The refuse, including the feathers, forms a base for a valuable nitrogenous fertilizer.

Accidentally Shot in Portsmouth.

While visiting his uncle in South Portsmouth, Wednesday evening, Louis Sledge, a 14-year-old colored boy, was accidentally shot in the abdomen with a gun by his cousin. The injured boy was brought to Norfolk and operated on at St. Vincent's hospital. Several of the shot took effect in the lad's intestines and were taken out from his back and the wounds sewed up. The patient is reported as doing well.

St. Vincent's Rebuilding Fund.

The following additional subscriptions to the St. Vincent's hospital rebuilding fund have been received by Treasurer Benham:

The Clyde Line, \$250.

Captain James W. McCarrick, \$100.

Joseph Hefflinger, of Hampton, \$50.

TO CURE A COLD IN ONE DAY.

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.
